

Recording Sheet, Reducing Parental Conflict Planning Tool Area Name: ROCHDALE Date: 30/07/2018

This is an example drafted by Rochdale Council to illustrate how a workshop using the Planning Tool can be briefly summarized in the recording sheet. It does not represent Rochdale’s full or agreed plan on reducing parental conflict.

	Progress level	Evidence of current progress	Gaps and areas for development	Priority SMART actions
PLAN				
1. Strategy	2/3	Early help assessment and action plan includes family conflict.	Data not sufficient to enable analysis & planning. Strategy in development, and RPC referred to in Family Services Model strategy & investment plan but not health and wellbeing strategy.	Work alongside Greater Manchester and national colleagues to enable better evidence-led planning.
2. Commissioning	1/2	This work is written into investment plan for Family Services Model which aligns resources across Stronger Families, Early Help and Place Based Integration.	Some examples of jointly commissioned programmes, however these are for DA rather than family conflict.	Written into the pledge that commissioning will reflect promoting positive relationships.
3. Workforce Planning	3	A small number of practitioners access integrated / specialist training.	Examples of well-established developments but not consistent or reflected in strategy / integration with wider workforce	Comprehensive training programme starts in Sept 18
LEAD				
4. Partnership	3/4	Family Conflict steering group feeds in to Family Services Model Group. Broad, representative group committed to the agenda and to action. Clear direction.		Drive and support the steering group / manifesto and resultant action plan to achieve measurable outcomes.
5. Leadership	3/4	The definition of leadership is broad and includes recognition of the role of community leaders and natural leaders.	Evident but not consistently across the entire leadership of the system.	Support citizens and (through the manifesto, pledge and action plan) system leaders to articulate and lead progress. Embed and expand the coordinated involvement of senior leaders.
6. Community Ownership	4	Some examples of citizens challenging local arrangements.		Embed and expand citizen involvement.

	Progress level	Evidence of current progress	Gaps and areas for development	Priority SMART actions
DELIVER				
7. Services & Interventions	2/3	Parental conflict is an indicator for an Early Help Assessment.	A lot of families don't present the issue of parental conflict until the process of engagement and trust is more advanced. Some practitioners not yet in a position to pick up conflict. Much of what is reported is just DV and not family conflict specifically. Messaging is not consistent and is dependent on individual workers.	<p>Broaden understanding and knowledge across the whole system through conference, manifesto, pledge, action plan and training programme.</p> <p>Improve definitional clarity between family conflict and DVA.</p>
8. Information & Data	1/2	Much of the data available for analysis and strategy is based on domestic abuse.	It doesn't provide a good picture to support the healthy relationships agenda. The data needed is not available in a way that would support this.	Work with colleagues in GM and nationally to resolve data issues.
EVALUATE				
9. Outcomes	2/3	A framework is in development	The usefulness of this is predicated on resolving issues around data and recording. To resolve this, the framework requires both person centred and systems outcomes.	<p>Work with colleagues in GM and nationally to resolve data issues. Develop a broader, person centred framework.</p>
10. Using & Generating Evidence	2/3	Good use of evidence from other areas and application / testing in a local context.	At first steps & reliant on some of the other areas.	Capture progress through steering group; broad reporting mechanisms.
